Inspectors Name _____ Date _____

General Checks	Pass/Fail	Comments
The area surrounding the equipment is clear of rubbish and debris.		
Inspect all timbers for damage and signs of decay.		
Inspect all chains, tyres and connections for wear, damage or corrosion.		
Inspect all steelwork for damage or excessive corrosion.		
All components are in place.		
Surface finishes are not damaged, rusting or deteriorating.		
Inspect all bushes and shackle pins for wear. We recommend any bushes with wear exceeding 50% be replaced and any shackle pins with wear exceeding 10% be replaced.		
All welds show no signs of cracking or corrosion.		
Check all foundations are secure.		
All parts are secure and that there is no excessive movement between them that may lead to finger traps.		
Ropes		
Inspect all components for any protrusions or sharp edges.		
Check all fixings are tight, in place and no protruding edges.		
Check that ropes are not frayed or vandalised and have no protruding wires.		
Check Eyebolts, Shackles and Links are secure and not worn.		
Bark Surfacing		
The bark has not dispersed.		
All Weather, CP Recreation & Safer Impact Surfacing		
The surfacing is not damaged and seams and edging are secure.		
Wet Pour Surfacing		
The surfacing is not damaged or crumbling		
Rubber Tiles		
The surfacing is not loose or damaged
