Our Material

We only use the highest quality and most durable preformed thermoplastic, providing many advantages over traditional painted or hot applied systems. All our playground markings are precision waterjet cut, allowing us to create extremely intricate designs. What's more, these thermoplastic markings are highly versatile meaning they can be fitted to most surfaces including concrete and tarmac.

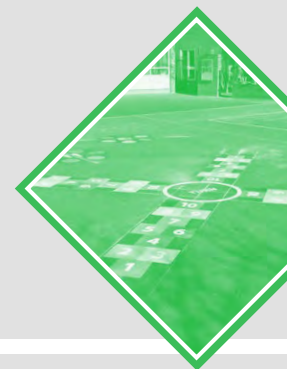

- ◆ High UV Resistance meaning the colours will stay bright for a long time
- ◆ Available in 18 eye-catching colours
- ◆ Non-toxic
- ◆ Environmentally friendly
- ◆ Contains no lead or chromates
- ◆ Safe anti-slip finish
- ◆ Flexible and durable
- ◆ Lasts 10 times longer than paint

Fun Games

Just like in the classroom, we understand that sometimes it's important for learning to be fun. By integrating fun into a child's educational journey, the development of softer skills alongside the improvement of more academic abilities makes for a well-rounded learning experience. Check out our range of fun thermoplastic playground games.

Targets

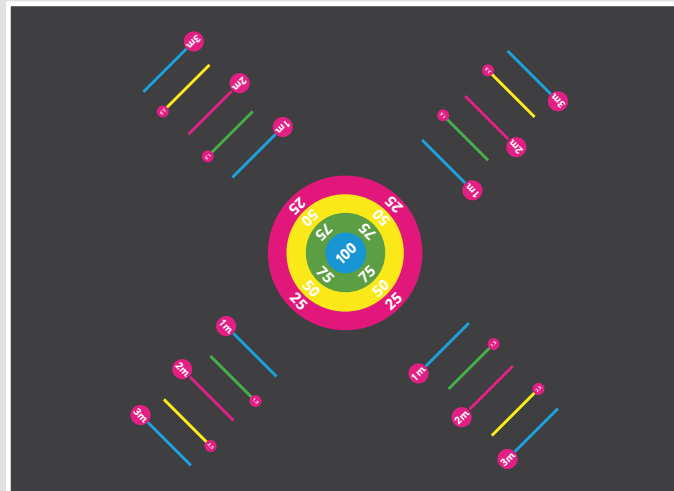

Hand-eye coordination is an important part of any child's development and isn't reserved purely for sport and competitive environments. Our target games are designed to improve these skills so that they can be applied in other areas. The bright and vibrant colours used in these targets increase children's enjoyment and engagement.

Sports Coating

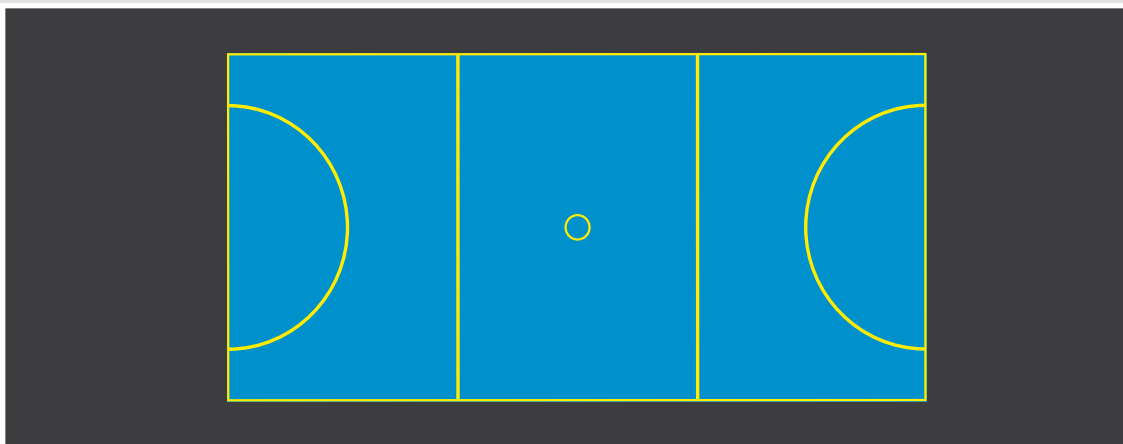

Our anti-slip sports coating is an advanced formula for marking sports courts. It provides a tough, eco-friendly, long-lasting finish and has a Slip Resistant Value of 60, making it safe in all weathers. It makes play areas brighter, friendlier, and more colourful.

We also offer water and solvent based tarmac binders for poor surfaces. This binds the top surface of a court to help it last longer prior to the anti-slip sports coating being applied.

Roadways

Our thermoplastic roadways offer the perfect opportunity for children to develop their understanding of the importance of road safety awareness. We can create anything from a cycle track to a roadway with engaging imagery including buildings, road signs and zebra crossings.

Mile a Day

We're passionate about improving outdoor areas to increase activity in children, helping to fight childhood obesity. Walking, running, or jogging a mile a day will take less than 20 minutes! Plus, it helps to improve fitness and make children more aware of their health. That's why our Mile a Day playground marking is perfect for any school wanting to encourage those first steps.

Removals

If you have old markings that you'd like removed, take advantage of our Playground Marking Removals service. There are different methods we can use, and our knowledgeable team will be able to advise you on which method is most suitable to use on your playground.

Vapour blasting

Our most effective method for removing playground markings is vapour blasting. A specially formulated abrasive media is mixed with a small amount of water, pressurised in a pressure pot, and blasted through a nozzle mixed with compressed air.

This process ensures minimal airborne dust as each piece of media, approx. 1mm wide, is encapsulated by the water. Whilst this is not the fastest or cheapest method of removing markings, it does so with minimal damage to the surface, best preparing the ground for new markings.

Our state-of-the-art removals machine allows us to deliver a high-quality service. Being very mobile, it's easy to get into most areas. Plus, its vapour blasting nozzle is extremely precise at only 2-3cm wide, which means damage caused to the surrounding surface can be completely avoided.

Whilst you will be able to faintly see where the old markings were, this technique leaves a lot less scarring than alternative methods such as hydro blasting and sand jetting.

Our removals are often completed at a weekend in order to minimise disruption at the playground. What's more, as part of the clean-up operation, we will either use a road sweeper or jet wash to make sure the playground is left in a tidy condition, at no extra cost.

Methacrylate Cold Plastic (MMA)

Our bold Methacrylate Cold Plastic (MMA) can be used to cover up any existing playground markings, plus it makes new playground markings stand out even more.

The MMA is rolled onto the ground, adding texture to the surface, which makes it slip resistant. Our thermoplastic markings are then applied over the top.

Available in a range of different colours.
